THE CAMPBELL PROGRAM

The Pharmaceutical Sciences major provides students with a broad background in basic and applied sciences. While in this program, our students gain strong quantitative, analytical, and communication skills. Most importantly, they gain the practical experience that industry demands of its employees.

The objective of the major is to prepare students for careers in the pharmaceutical industry with particular emphasis on pharmaceutical sciences. Graduates will be prepared to enter research and technical positions in the pharmaceutical industry or to pursue postgraduate studies.

THE CAMPBELL APPROACH

The majority of Pharmaceutical Sciences courses include labs where you will have the opportunity hone your technical skills. Moreover, there's the benefit of a Senior Internship taken during your final semester.

You'll have an opportunity to do your internships in North Carolina's Research Triangal Park area, home to many world-renowned pharmaceutical and chemical companies.

THE CAMPBELL FACULTY

Campbell is a student-oriented university, which means we make students' educational need our top priority. Interacting inside and outside the classroom with our faculty is a plus. All faculty members maintain an open door policy and encourage you to take advantage of their vast experience.

Our professors in Pharmaceutical Sciences are experienced teachers, as well as practicing scientists. They routinely present papers at major national and international forums and publish their findings in top scientific journals. They are also frequently called upon to serve as expert consultants for federal agencies like the FDA and EPA and for major companies world wide.

THE CAMPBELL RESOURCES

We have state-of-the-art scientific instruments and labs for you to use at Campbell. We've created a unique cooperative arrangement that will give you the chance to visit cutting-edge facilities at a variety of institutions. Scientists from many of central North Carolina's major research institutions will work with you in our program.

We sponsor several clubs and professional organizations relevant to the field, which will help you to become better acquainted with career opportunities.

PHARMACEUTICAL SCIENCES: BACHELOR OF SCIENCE

We're looking for students with strong interests in research and the technical aspects of pharmaceutical sciences who possess a sound background in the biological, chemical, and physical sciences.

Candidates for the BS degree with a major in pharmaceutical sciences (BSPS) must satisfy all College of Arts and Sciences requirements as set forth in the General College Curriculum section of the university catalog. Prior to entering the major, students must have completed a minimum of 64 semester hours of college credit taken from the core liberal arts curriculum and must include the following courses or their equivalents: Basic Biology, Human Anatomy and Physiology, Microbiology and Immunology, General Chemistry (2 semesters), Organic Chemistry (2 semesters), Calculus, and General Physics (2 semesters).

The course work for this major is rigorous and challenging and is accompanied by a significant amount of student autonomy. Strong analytical skills are necessary, along with high personal motivation, perseverance, and dedication.

The Campbell Advantage

Although this is a relatively new major at Campbell, we have an impressive track record in the natural sciences, and we are making a strong commitment to this field. As a result, you'll discover at Campbell:

- A widely respected, award-winning faculty committed to your success and well-being.
- A program designed to complement your initiative and talents with a significant advantage in gaining acceptance to entry-level research and technical positions and graduate or professional schools.
- A distinctive dedication to quality liberal arts educations, free enterprise, and our Christian Mission.

Curriculum Outline Pharmaceutical Sciences

CAMPBELL

UNIVERSITY

FRESHMAN YEAR

SEMESTER 1			SEMESTER 2
