

GOVT/HIST 403. History & Politics of International Economic Relations. Fall 2009.

T-Th 9:30-10:50 David W. Thornton 205 D. Rich 893-1488 thornton@campbell.edu

COURSE OBJECTIVES:

This course investigates at the international level the interaction of political and economic factors in the creation and distribution of wealth and power. Adopting a historical approach, the course examines the forces and trends involved in the emergence of today's global political economy from its roots in early modern Europe. In studying the phases of development of capitalism-- commercial capitalism, mercantilism, imperialism, industrialization, the rise of the welfare and national security states-- the course emphasizes the relationship between political authority and market structures in shaping a dynamic social system capable of creating immense wealth and driving rapid and sustained technological change. We also will investigate the spread of capitalism around the globe, emphasizing all along the close connection among the economic, political, technological and military dimensions of power.

Building upon the conceptual and informational foundation laid in this historical inquiry, the course then turns to current issues in international political economy, including: production and employment, trade and protectionism, monetary and financial relations, and problems of economic development, natural resource use and environmental degradation. In examining each of these issues, the focus will be upon how political and diplomatic concerns interact with commercial and technological considerations in shaping the relative fortunes of countries in their economic relations. The relationship between state and market--sometimes symbiotic and sometimes in conflict--lies at the core of the study of political economy; this course probes the analytical and practical connections between politics and economics as they shape the structure and workings of the current international environment.

Regarding its connection to the [Mission of Campbell University](#), this course seeks to accomplish the following:

- A. transfers to students the vast body of knowledge and values accumulated over the ages
- B. encourages students to think critically and creatively
- C. forges a community of learning that is committed to the pursuit, discovery, and dissemination of knowledge

These **Learning Outcomes** accomplish the General Education Competencies (as listed below): Students completing GOVT 403 will be able to:

- *) Describe and discuss the major features of IPE as a discipline I.(all), III.(all), IV.(all)
- *) Discuss in specific detail (both in class and on written exams) the contribution of Paul Kennedy to our understanding of the dynamic connection between wealth and power in the development of the global political economy I.(all), III.(all), IV.(all)
- *) Compare and contrast (both in class and on written exams) three major theories of international economic relations (liberal, mercantilist, structural), and articulate their corresponding policy prescriptions. I.(all), III.(all), IV.(all)
- *) Apply and assess (both in class and on written exams) the relative merits of those theoretical perspectives in connection to important issues in IPE, to include: trade and production, money and finance, economic development and the role of TNCs.
- *) Select, read, analyze the most important aspects of major analytical and historiographic works in IPE, and effectively present in written and oral form the results of their research. I.(all), II.(all), IV.(all), VI.(all)

I. Reading: Textual and Non-Textual:

1. Students will be able to read competently in English from a variety of source types (e.g., mathematic, scientific, literary)
3. Students will be able to read with understanding, so as to be able to apply discipline methodologies and theories in the areas of Fine Arts, Humanities, Mathematics, and the Sciences
4. While reading, students will be able to recognize logical and compositional structures of various disciplines
 - 4.1. Students will be able to comprehend various linguistic, compositional elements and processes leading from a topic sentence to a conclusion
 - 4.2. Students will be able to comprehend conclusions based on numerical and graphed data

II. Mathematics: Practical, Logical and Speculative

1. Students will be able to solve problems that include basic skills necessary for life
 - 1.1. Students will be able to multiply, divide, add, subtract, and operate with fractions, decimals, and proportions
 - 1.2. Students will be able to solve real world problems based on these primary skills

III. Critical Thinking: Inquiry, Analysis and Solution

1. Students will be able to make discipline specific inquiries

Students will be able to use a variety of discipline-specific methods to recognize the existence of a problem

Students will be able to use the proper methodologies to form questions about a problem at hand, and the implications of the question

 2. Students will be able to solve a problem which has been discovered and defined
 - 2.1 Students will learn to form relevant and concrete questions concerning evidence of a problem
 - 2.2 Students will be able to analyze the evidence defining a problem
 - 2.3 Students will be able to construct well-supported, clearly articulated, and sustained arguments based on evidence
 3. Students will be able to reach a logical solution
 - 3.1 Through asking the right questions, students will be able to eliminate false assessments and solutions
 - 3.2 Students will be able to recognize a true solution and articulate the reasons for making that recognition

IV. Communication: Verbal and Non-Verbal

1. Students will learn to communicate verbally in written form
 - 1.1 Students will be able to write an essay with a focused purpose
 - 1.2 Students will be able to support the essay's purpose with a logical and organized sequence of ideas and evidence
 - 1.3 Students will be able to use the proper level of diction for the subject and the audience of their essay
 - 1.4 Students will be able to use proper documentation for their essay's discipline and the discipline's methodology
 - 1.5 Students will learn to minimize errors in spelling
 - 1.6 Students will learn the basic computer software applications which can aid in their essay's presentation

VI. Student Use of Technology in the Sciences, Arts, and Humanities

2. Students will learn to gather information using technology in the library and on the internet
 - 2.1 Students will learn a library's digital organization, (e.g., homepage, search tools, catalogues, etc.)
 - 2.2 Students will learn to use the library's digital resources to gain primary and secondary information
 - 2.3 Students will learn to use the resources of the internet properly in order to gain quality primary and secondary texts, images, and sounds.

COURSE REQUIREMENTS:

Students are evaluated on their demonstrated understanding of material covered in the assigned readings and lectures, as well as on the satisfactory completion of written and oral assignments. The attached schedule describes the course topics and corresponding readings, and includes dates for scheduled examinations and other requirements. Any questions or problems with course objectives, requirements, assignments or evaluation should be addressed promptly and fully in consultation with the professor. Please feel free to speak with me at any time (not only during posted office hours) or schedule an appointment for your convenience.

Grading and Evaluation: Course grades are based on a variety of criteria, including performance on tests and final examinations, as well as in-class assignments and participation, and the written/oral projects.

The midterm and the final exam are assigned the following weights in the calculation of grades: **Midterm: 20% Tue. 6 October. Final: 30% Tuesday 1 December, 8:00 am).**

The written/oral presentation projects will account for **30% (15% each)** of the final grade, and are described in detail below.

The remaining **20%** of the course grade will be based upon class participation, which includes taking part in discussion of the readings, and performance on in-class quizzes or assignments.

In a class of this size, schedule and format, attendance is extremely important. Students should attend every session scheduled, and come to each meeting prepared to perform effectively. Consult the [Undergraduate Studies Bulletin](#) (p.23) concerning official University attendance policy. Failure to attend all scheduled class meetings will adversely affect your performance in all aspects of the course. I understand that policy not to mean students may take a number of "cuts" without penalty during the semester. Rather, absences from class should occur only for reasons of illness (to be documented by a doctor's excuse) or personal emergency (to be explained to me)--all others will be subject to penalty.

Laptops, mobile phones and other electronic devices:

The use of a laptop computer is allowed with my permission for class-related purposes only, such as taking notes. Any use that is distracting from or disruptive to the classroom environment is prohibited, and will result in revocation of the privilege. The use of cell phones and other electronic devices for any purpose during class is not permitted. Violation of this policy can result in academic and/or conduct penalties. Any use of such devices during graded activities (quizzes, tests, exams) will be treated as an instance of academic misconduct. ([Student Handbook](#), pp.66-67).

All students are subject to the academic integrity and behavioral expectations of the University as described in the [Student Handbook](#).

Students with documented disabilities who desire modifications or accommodations should contact the office of [Student Support Services](#) located in the University's Hight House.

The [inclement weather policy](#) can be found in Campus section of the Campbell University webpage.

REQUIRED TEXTS:

Balaam, David N. & Michael Veseth. Introduction to International Political Economy. 4th Ed. Pearson Prentice Hall, 2007.

Abbreviated [B & V] in course schedule.

Kennedy, Paul. The Rise and Fall of the Great Powers. Vintage Books, 1987.

Abbreviated [K] in course schedule.

Items placed on reserve in Carrie Rich Library

Abbreviated [R] in course schedule.

SCHEDULE OF LECTURE TOPICS AND ASSIGNED READINGS:

Week 1 (17-21 Aug.) International Political Economy: Scope & Issues.
Syllabus.

Section I. The Historical Development of the Capitalist World Economy.

Week 2 (24-28 Aug.) Patterns in the Economic & Political Development of Modern Europe: Competition, Conflict & Innovation.

[K] Introduction, Ch. 1 & 2. **Lecture and discussion (No Presentation).**

Week 3 (31 Aug.-4 Sep.) Mercantilism, Exploration & Conquest: Governments & Entrepreneurs in Symbiosis.

[K] Ch. 3. **Topic 1 Presentation 3 September.**

Week 4 (7-11 Sep.) Industrialization: Invisible Hand or State Sponsorship? Wealth, Power & the Role of the State.

[K] Ch. 4. **Topic 2 Presentation 10 September.**

Week 5 (14-18 Sep.) Industry, Technology & Empire.

[K] Ch. 5. **Topic 3 Presentation 17 September.**

Week 6 (21-25 Sep.) Ideology, Economics & Warfare in the Mid-20th Century.

[K] Ch. 6. **Topic 4 Presentation 24 September.**

Week 7 (28 Sep.-2 Oct.) The Third World & the International Political Economy.

[K] Ch. 7 & 8. **Topic 5 Presentation 1 October.**

Week 8 (5-9 Oct.) **Midterm Exam Tuesday 6 October. Fall Break.**

Section II. Theory & Issues in International Political Economy.

Week 9 (12-16 Oct.) Theoretical Perspectives on IPE: Mercantilism, Liberalism & Structuralism.

[C] Ch. 1-4. **Lecture & Discussion. No Presentation 15 October.**

Week 10 (19-23 Oct.) International Production, Trade & Technology.

[B & V] Ch. 6 & 10. **Topic 6 Presentation 22 October.**

Week 11 (26-30 Oct.) International Financial & Monetary Relations.

[B & V] Ch. 7 & 8. **Topic 7 Presentation 29 October.**

Week 12 (2-6 Nov). International Aspects of Economic Development.
[B & V] Ch. 15, 16 & 19. **Topic 8 Presentation 5 November.**

Week 13 (9-13 Nov.) States & Transnational Corporations.
[B & V] Ch. 17. **Topic 9 Presentation 12 November.**

Week 14 (16-20 Nov.) A Transition from Communism to Capitalism?
(B & V) Ch. 13. **Topic 10 Presentation 19 November. Thanksgiving Break.**

Week 15 (23-27 Nov.) Student Course Evaluation & Exam Review.

Written/Oral Projects: The Historiography of International Political Economy.

Twice during the semester, each student is responsible for presenting an in-depth analysis of an important work in IPE. Under the topic headings below is a list from which students will select a book for written review, and on which will also be based an oral presentation. Based on a careful reading the student will summarize and analyze the work, with special attention paid to the author's arguments and evidence concerning the key issue addressed in this course--the relationship between political authority and economic forces in creating wealth and power at the international level. Rather than merely summarizing its contents, students should instead select for detailed analysis and criticism those aspects of the work bearing most directly on specific the topic for that week. While individual review essays may vary in form and content due to differences in the works themselves, students should aim to produce a paper of 2000-3000 words in length--8-12 typed pages using normal font and margins. All paraphrasing and direct citations should be appropriately documented, and any sources used other than the work itself should be listed. In addition to the discussion of the book and its relevance, the reviewer should provide a biographical sketch of the author(s) and their contribution to the field of IPE.

BOOK REVIEW TOPICS & SELECTION LIST

Books other than those listed below must be approved in advance.

SECTION I. HISTORY OF INTERNATIONAL POLITICAL ECONOMY.

TOPIC 1: Mercantilism, Exploration and Conquest, 1500-1750. **Presentations Thursday 3 September**

Abernethy, David. Global dominance: European overseas empires, 1415-1980.
Yale University Press, 2001.

Andrews, K. R. Trade, plunder and settlement. Cambridge University Press, 1983.

Cipolla, C. Guns, sails and empires. Pantheon, 1965.

Curtin, Philip D. The world and the west. Cambridge University Press, 2000.

Elliott, J. H. Imperial Spain. St. Martin's Press, 1964.

Eltis, David. The rise of African slavery in the Americas. Cambridge University Press, 1999.

Furber, Holden. Rival empires of trade in the Orient. University of Minnesota Press, 1976.

- Hindraker, Eric. Elusive empires: constructing colonialism in the Ohio valley, 1683-1800. Cambridge University Press, 1999.
- Lenman, Bruce. Britain's colonial wars, 1550-1688. Longman, 2001.
- Lenman, Bruce. Britain's colonial wars, 1688-1783. Longman, 2001.
- Loades, David. England's maritime empire: seapower, commerce and policy, 1490-1690. Longman, 2000.
- Mann, Charles C. 1491: New Revelations of the Americas Before Columbus. Knopf, 2005.
- Parry, J.H. The establishment of European hegemony, 1415-1757. Harper, 1959.
- Reid, Anthony. Southeast Asia in the age of commerce, 1450-1680. 2 Volumes (Pick 1) Yale University Press, 1990, 1995.
- Ringrose, David. Expansion and global interaction, 1200-1700. Longman, 2001.
- Subrahmanyam, Sanjay. The Portuguese empire in Asia, 1500-1700. Longman, 1993.
- Steele, Ian K. Warpaths: invasions of North America. Oxford University Press, 1994.

TOPIC 2: State & Market in the Era of Industrialization.
Presentations Thursday 10 September

- Bensel, Richard F. The political economy of American industrialization 1877-1900. Cambridge University Press, 2000.
- Blackwell, William. The industrialization of Europe: a historical perspective. H. Davidson, 1994.
- Cameron, Rondo. France and the economic development of Europe. Princeton University Press, 1961.
- Chandler, Alfred D. Jr. Strategy and structure: chapters in the history of the American industrial enterprise. MIT Press, 1962.
- Feis, Herbert. Europe, the world's banker 1870-1914. Norton, 1965.
- Gerschenkron, Alexander. Economic backwardness in historical perspective. Harvard University Press, 1962.
- Evans, E. J. The forging of the modern state: early industrial Britain, 1783-1870. 3rd Edition. Longman, 2001.
- Gordon, Robert B. and Patrick M. Malone. The texture of industry: an archaeological view of the industrialization of North America. Oxford University Press, 1994.
- Hobsbawm, Eric. The age of capital, 1848-1875. Scribner, 1975.

Landes, David. The unbound Prometheus. Cambridge University Press, 1969.

Lazonick, William. Business organization and the myth of the market economy. Cambridge University Press, 1991.

Mantoux, Paul. The industrial revolution in the eighteenth century. Harper and Row, 1961.

Noble, David F. America by design: science, technology and the rise of corporate capitalism. Oxford University Press, 1979.

Polanyi, Karl. The great transformation. Beacon Press, 1944. HC 53.P6

Sagers, John H. Origins of Japanese Wealth and Power: Reconciling Confucianism and Capitalism, 1830-1885. Palgrave Macmillan, 2006.

Smil, Vaclav. Creating the Twentieth Century: Technical Innovations of 1867-1914 and Their Lasting Impact. Oxford University Press, 2005.

Smith, Adam. The wealth of nations. Dutton, 1964. HB 161.S65

Tilly, Charles. Coercion, capital and European states. Basil Blackwell, 1990.

Webber, Carolyn, and Aaron Wildavsky. A history of taxation and expenditure in the western world. Simon and Schuster, 1986.

TOPIC 3: Industry, Technology & Empire, 1750-1920.

Presentations Thursday 17 September

Cain, P. J. Economic foundations of British overseas expansion, 1815-1914. MacMillan, 1980.

Crowder, Michael. West African resistance: the military response to colonial occupation. Hutchinson, 1978.

Edney, Matthew H. Mapping an Empire: the geographical construction of British India. University of Chicago Press, 1997.

Edelstein, Michael. Overseas investment in the age of high imperialism: the United Kingdom 1850-1914. Columbia University Press, 1982.
